COLBY RESOURCES

TRAINING

One of the most valuable assets of any company is its people. Colby Resources believes that if the employees of your company are trained well and given opportunities to advance their skills, they will be more efficient and productive.

Colby Resources provides instructor-led end user software training to our client corporations locally, regionally and nationally. Whether you need designing or training for a full scale software migration, assistance with training a new software program or upgrade, or instruction on specific features of an application, the certified instructors at Colby Resources will maximize the return on your technology investment. We focus on:

- Planning & Education
- Course Development, Design & Implementation
- Software Application Training
- Webinars
- On Site Lunch-N-Learn
- Floor Support/Help Desk
